20 YEARS OF IMPACT

For over twenty years, Art with Heart has been using the healing power of art to help kids facing trauma or adversity, find peace. Our therapeutic, art-based curriculum and activity books are a proven path to developing resilience and hope in kids.

ACEs & CREATIVE EXPRESSION

“ACEs are adverse childhood experiences that harm children’s developing brains and lead to changing how they respond to stress and damages their immune systems so profoundly that the effects show up decades later.”

- ACES Connection, ACES Science 101

A staggering 35 million American kids are struggling with ACEs. After exposure to multiple ACEs, kids have twice the risk of heart disease, three times the risk of depression, and a greater risk of chronic disease, mental illness, and violence.

Stress is a natural and inevitable part of being a kid. The type of stress makes a difference and when stress becomes toxic, kids’ brains aren’t able to develop. Trauma or toxic stress, are stored in images, sounds, and sensations; creativity uses those same things to bring the brain back online.

BOOKS & CURRICULA TO HELP REDUCE TOXIC STRESS

Art with Heart’s portfolio of therapeutic activity books for kids, and companion curricula for the adults who serve them, are a jumping off point for transformation. Our creative expression resources can help kids understand and release difficult feelings, develop social emotional learning (SEL) skills, and build resiliency for a healthier future.
HOW CREATIVE EXPRESSION REWIRE THE BRAIN

Creative expression activates the same parts of the brain that experience disruption due to toxic stress. It creates opportunities for the amygdala, which is responsible for our fight/flight/freeze response, to calm down. Creative expression helps the pre-frontal cortex to get back in charge of the body, while helping the hippocampus to put memories in the past where they belong.

PREVENTION & INTERVENTION

“Art with Heart aligns with what we’re doing in schools, especially for students who have been impacted by a traumatic event or ongoing adversities that don’t let up. We don’t want those students to sit in a state of elevated anxiety. Art with Heart gives kids avenues to be heard, and teaches them to recognize an emotion and regulate that emotion, which puts them in a position to be more successful, both academically and behaviorally.”

– David Lewis, LMHC, Behavioral Health Services, Seattle Public Schools

“Art with Heart is a great complement for a social-emotional learning curricula like Second Step. It gives children a chance to look inside and process the feelings that arise; plus all of the topics and issues that explored in all of AwH materials gives kids even more opportunities to process their emotional experience.”

– Tonje Molyneux, M.Ed., Sr. Educational Designer, Committee for Children

PREVENTION:

Kids learn Social Emotional Learning skills through creative expression, which helps them better understand themselves and others. Kid’s emotional well-being is improved.

INTERVENTION:

When a kid experiences trauma or adversity they can use creative expression to makes sense of the experience and to calm their bodies down.
PRIMARY SEL GOALS:

• Self-awareness
• Self-management
• Social awareness

PRIMARY THERAPEUTIC GOALS:

• Examine identity
• Explore and develop personal values
• Develop capacity to tolerate mixed emotions
• Identify helpful and unhelpful thoughts and misconceptions
• Create safe distance from experience to express feelings
• Identify support systems

GRADES K - 2 | MAGNIFICENT MARVELOUS ME!

Magnificent Marvelous Me! gives kids a chance to name their emotions, identify their support systems, and recognize dreams for the future. This 48-page therapeutic activity book is designed to decrease isolation and helplessness, increase self-esteem and self-awareness, offer a safe place for confusing feelings, and help build resilience and coping skills when faced with challenges. Includes 25 different activities including drawing, writing, and coloring with prompts about identity, community, and emotional vocabulary.

Therapeutic activity book for kids:

Companion curricula for adults:

Lesson 5: Tree of Life  Page 7

"Many a man with no family tree has succeeded because he branched out for himself."
—Leo Aikman

SEL SKILL DEVELOPMENT: Identity Building, Relationship Skills

Magificent Marvelous Me! Leader’s Companion

Identity Building, Relationship Skills

MATERIALS: foam, wax, or oatmeal can for base, sticks, leaves, paper, paint, ribbons, scissors, hole punchers

PREP: Gather photos to share of nature-based art, including tableau. Create the base of the tree from objects that branches can easily pierce or stick out of, such as a stand-up piece of foam, an oatmeal can, or an old vase. The important part is that they branches support the leaves and that they’re natural materials, such as sticks and leaves. Explain that the type of tree you mime will help inform the scene the children create. Make what the children will be doing by shouting out, "I’m a _____ tree!" Then call out the name of each child in your group. The children will cut the tree and create another piece of the scene beside the tree. Have children shout out what they are. For example, "I’m the trunk!" Make extra beauty, which later turn into blossoms.

EXPLAIN: Here in the Magnificent Marvelous Me! group we’re part of a community. And we each come from communities of our own. We’re going to create a tree together as a group that highlights those communities: each participant will have a branch in the community tree. Each branch will be different, but there is still unity in that we create a new object when all our branches come together.

CREATE:

1. Spend part of the first lesson on a nature walk to collect natural materials, such as sticks and leaves. Explain that the branches support the leaves and that they’re going to represent the supports in our lives.
2. Back in the classroom, allow participants time to decorate their branches with things that remind them of their supports. They can use directly on the branches with paint pens or metallic markers, or write on ribbons and tie them to the branches. The important part is that they focus on people who support them and decorate the branches with these people in mind.

Curriculum goes here
CHIT CHAT: THERAPEUTIC GOALS

- Explore what is important to them
- Focus on solutions
- Release of helplessness; provide corrective power
- Prompt projection/reflective distance
- Identify misperceptions or unhelpful views
- Build confidence
- Decrease feelings of isolation
- Normalize/recognize commonalities
- Identify/support system
- Encourage assertiveness to express needs
- Encourage storytelling
- Increase awareness of mind/body connection
- Prompt creative symbolic reasoning
- Reduce negative emotional/behavioral responses
- Guard against anxiety/fear
- Reframe thoughts with positive message

GRIEF - FITI WALL

EXPLAIN: Who knows what graffiti is? Graffiti is when someone writes, draws, or "tags" a message without permission on a public space. Sometimes when people offer advice or say things that are not so nice, it kind of feels like they are "tagging" on us - saying things that are unwelcome. On this wall, use the thin-tipped markers to write all the messages you've heard that are hurtful things or make you feel icky. Once you are done, use the thick-tipped markers to cover over those messages with things you want to say to them or messages you think they should hear. You can also draw over or cross out the negative messages as you go.

CLAY CONVERSATION

EXPLAIN: Sometimes people who love and care about us aren't quite sure what to say when we talk about what happened. Sometimes people try to help us feel better, but what they say actually makes us feel worse. Has that ever happened to you or have you heard people saying things like that? How did those comments make you feel? We are going to make creatures out of clay that represent those helpful comments and how they make us feel. Pass out clay. When you are done making your helpful creatures, you can smear or smash it. Take photos of the clay creatures before they are destroyed.

OPTIONAL: Don’t smash the creature, but make a new creature showing how you'd like to feel instead and let the two play out a conversation between them.

"We think that holding on makes us strong, but sometimes it is letting go.”
- Herman Hesse

Sample book activity

SELF-REVERSAL ACTIVITIES: CHIT CHAT / LISTEN TO ME! PG. 28-29

Draw It Out offers kids a safe place to ask difficult life questions and ponder their answers. This creative-expression book supports kids in better understanding their complex and confusing emotions, whether healing from grief or a major loss, or facing chronic adversity and ongoing life challenges. It invites kids to share their emotions, identify their support systems, and learn coping strategies and skills for self-care.

Therapeutic activity book for kids:

Companion curricula for adults:
Ink About It asks middle-school kids what they want from relationships, how they handle stress, and what goals they most want to accomplish. Grades 6 through 8 are critical social and emotional learning years, so this book is designed to reach young people with writing and art prompts for self-exploration, self-awareness, and self-acceptance. Includes 20 different activities with various themes; including identity, emotion regulation, and relationships.

**Therapeutic activity book for kids:**

**ART ACTIVITY: RAY OF LIGHT COLLAGE**

**MATERIALS:** Acrylic paint, paper towel, plastic dish, plate, small plate for circle templates, cardboard, pencil, chalkboard or cardboard (for collage backing), scissors, magazines, Mod Podge

**OPTIONAL MATERIALS:** Supply additional ephemera, as well as watercolor paper to add to their collage. Make sure to provide strong glue (such as Mod Podge) to make sure 3-D items will adhere.

Take out the circle. Write down the emotion words. Look at the workbook. Make other emotions so that each participant gets listed one emotion for the PRIMING ACTIVITY. Then have the participants act out their emotion, without talking. Help us really feel the emotion. The group member who is not acting out the emotion will try to guess what the emotion is. Continue until the last participant has gone. End with some stretching and quiet breathing to create body awareness.

How easy was it to guess your group member’s emotions on the first try? Was it hard for anyone? Discuss as a group.

Sometimes emotions can show up differently for different people. Some people express their emotions in obvious ways, and for other people, it’s not so obvious. If it is anticipated that participants will be uncomfortable acting in small groups, we can discuss how people can show the same emotions differently from person to person.

**ART WITH HEART FOR KIDS:**

**ART WITH HEART FOR KIDS:**

If it is anticipated that participants will be uncomfortable acting in small groups, we can discuss how people can show the same emotions differently from person to person.

**PRIMING ACTIVITY: COMPARE/CONTRAST**

**WORKBOOK:** Have participants answer the prompts in the workbook.

There is a huge connection between how we think and feel and how our bodies react. It’s called the mind-body connection, and it works both ways: when you are feeling negatively, your body reacts negatively. But you can also use your thoughts to positively influence some of your physical responses. When you think about happy times or think calming thoughts, your body tends to relax.

Divide participants into small groups and pass out premade emotion word cards, one per person, and ask them not to share with each other (clear out any furniture, as this game requires room to move). Take turns among your small group to individually act out your emotion, without talking. Help us really feel the emotion. The group member who is not acting out the emotion will try to guess what the emotion is. Continue until the last participant has gone. End with some stretching and quiet breathing to create body awareness.

Chill & Spill combines prompts and activities as well as blank pages, giving teens lots of room to express their feelings, fears, and frustrations. Using a blended therapeutic approach of art therapy, narrative therapy, and cognitive-behavioral therapy, this eclectic journal is uniquely designed to reach teens who are reluctant to communicate. Includes 10 different activities with various themes; including self-care, reflection, and goal setting.

**Therapeutic activity book for kids:**

- **Powerful & Powerless Therapeutic Goals**
  - Prompt creative symbolic reasoning.
  - Examine identity, confidence, and self-esteem.
  - Use creativity to problem-solve.
  - Tolerate mixed emotions.
  - Create safe distance from experience to express feelings.
  - Identify helpful and unhelpful thoughts and misconceptions.
  - Integrate past experiences.

**Companion curricula for adults:**

- **Tab Three: Activities Ideas for Variation: Powerful/Powerless, Chill & Spill**
  - "Know well what leads you forward and what holds you back ..." —Buddha
  - **Powerful/Powerless Therapeutic Goals**
    - Increase awareness of emotion/cognition connections
    - Develop capacity to tolerate mixed emotions
    - Create safe distance from experience to express feelings
    - Identify helpful and unhelpful thoughts and misconceptions
    - Integrate past experiences

**Sample Book Activity**

- **Powerful Tattoo**
  - Introduce the concept of "Power Poses" to them (do a Google search for more details).
  - Ask them to notice how their body feels before doing the pose as compared to after.
  - Have participants write a two-column list of situations, people, places, or things that made them feel powerful.
  - Ask participants to review the list they wrote in their journals and do Thumbnail Sketches of simple images that represent the concepts.
  - Have participants trace their hand and part of their arm in pencil, and "tattoo" one of these images on the drawing as a reminder of things they have achieved and things they are still reaching for in their lives.

- **Powerful Collage**
  - Have participants use their nondominant hand to draw their hands and cut them out.
  - Have participants find words and images in magazines that represent things they wrote on their powerful list.
  - Have participants paste these images on the hands and complete a Free Association (Tab 4, p. 94) on a couple of key words.

**Sample Curricula Lesson**

- **Powerful/Powerless**
  - **Tab Three: Activities Ideas for Variation: Powerful/Powerless, Chill & Spill**
  - **Powerful & Powerless Therapeutic Goals**
  - Increase awareness of emotion/cognition connections
  - Develop capacity to tolerate mixed emotions
  - Create safe distance from experience to express feelings
  - Identify helpful and unhelpful thoughts and misconceptions
  - Integrate past experiences

**Art with Heart**

- Copyright © 2015 Art with Heart • artwithheart.org • Chill & Spill Leader’s Companion
Creative expression is a simple and meaningful way for people of all ages to build self-awareness and self-management skills.

Therapeutic activity books for kids:
Although the books have suggested age ranges, it is important to consider the developmental age of the kids with whom you work. We trust that you know them best, and can gather resources that best fit their needs. In fact, Art with Heart resources have been used successfully with adults as well. Creative expression is a simple and meaningful way for people of all ages to build self-awareness and self-management skills.

Each book contains approximately 30 pages filled with illustrations and prompts for creative writing and visual art exercises.

Companion Curricula for adults:

• 100+ art activities
• Alignments with Common Core, CASEL and Second Step
• Best Practices for creative expression
• Planning guides for implementing a creative expression program
• Tips and tricks for various art materials

Our books and curricula can be used on their own, however, the continued use with a trusted adult in one on one sessions or groups can help kids expand their toolbox and empower them to dig deep into the skills that help them turn pain into possibility.
ACADEMIC & THERAPEUTIC ALIGNMENT

Academic alignments

Social and emotional learning (SEL) is the process through which children and adults understand and manage emotions, set and achieve positive goals, feel and show empathy for others, establish and maintain positive relationships, and make responsible decisions. (CASEL https://casel.org/what-is-sel/)

CASEL has identified five core competencies of social and emotional learning: self-awareness, self-management, social awareness, relationship skills, and responsible decision making. Art with Heart has aligned every activity in our resources with these competencies, so that you can easily incorporate creative expression into your existing SEL program, or use our curriculum to start one.

Second Step is a program rooted in social-emotional learning (SEL) that helps transform schools into supportive, successful learning environments uniquely equipped to encourage children to thrive. (https://www.secondstep.org/what-is-second-step) Second Step provides curricula for education professionals and families to help kids develop their SEL skills.

Art with Heart has aligned every activity with the corresponding Second Step SEL curricula so that teachers have additional activities for teaching SEL using creative expression.

Therapeutic alignments

In addition to SEL alignments, Art with Heart has created a therapeutic goals alignment to support one on one or group therapeutic work. Developed by art therapists and trauma therapists, these goals are also aligned with the CASEL competencies. These goals include: examine identity, develop capacity to tolerate mixed emotions, build empathy, encourage assertiveness in expressing needs, and foster hope for the future, as well as many others.

“Art with Heart is a great complement for a SEL curricula like Second Step. It gives children a chance to look inside and process at their feelings that arise, giving them more opportunities to process their emotional experience.”

– Tonje Molyneux, M.Ed., Sr. Educational Designer, Committee for Children
TESTIMONIALS

IN SCHOOLS
Art with Heart resources have been used in many different ways in schools. In after school programs, social workers or school counselors in small group settings, and teachers in full classrooms have all incorporated creative expression activities to help students thrive.

Social workers and school counselors use our curricula to run small groups focused on specific issues or identity development, or one-on-one to support a student’s emotional experience. Teachers incorporate creative expression activities in our curricula to support their dedicated SEL time.

“Art with Heart aligns with what we’re doing in schools, especially for students who have been impacted by a traumatic event or ongoing adversities that don’t let up. Art with Heart resources gives kids avenues to be heard and teaches them to recognize an emotion and regulate that emotion, which puts them in a position to be more successful, both academically and behaviorally.”

–David Lewis, LMHC, Behavioral Health Services, Seattle Public Schools

IN HOSPITALS
Art with Heart has collaborated with children’s hospitals around the country to provide child life specialists and social workers with resources to make the hospital experience less difficult for kids experiencing illnesses and their families. Professionals who have one or two opportunities to connect with kids can introduce an activity and then provide books for them to continue the process of developing coping skills and expressing emotions.

“Art with Heart’s creative expression books and curricula are helpful in finding ways to start those difficult and meaningful conversations between patients and providers, or patients and their families.”

–Helena Hillinga-Haas, art therapist, MA, ATR, CL, Seattle Children’s

AFTER A NATURAL DISASTER
Our resources have also been used after natural disasters and community-wide traumas, such as the landslide in Oso, WA and the school shooting at Sandy Hook Elementary in Newton, CT. The creative expression activities found in our books provided a safe space for kids to process their grief and loss.
PROFESSIONAL DEVELOPMENT

Art with Heart provides in-person and online trainings, as well as one-on-one and organization-wide consulting to empower adults to learn to use creative expression with kids to build social emotional learning skills, and develop a new coping mechanism when faced with adversity. We recommend organization or team wide trainings. Reach out if you want a custom training for your school, community based organization, or institution.

CEUs available for all in-person trainings.

PHONE: 206.362.4042
EMAIL: trainings@artwithheart.org

IN-PERSON TRAININGS & WEBINARS

We offer a variety of 4-hour in-person creative expression trainings, as well as one-hour webinars, on myriad subjects ranging from creative expression and SEL, to creative expression and ACEs. Please visit our website for the current schedule and pricing.

WEBSITE: artwithheart.org/learn
PHONE: 206.362.4042
EMAIL: trainings@artwithheart.org

CUSTOM TRAININGS & TEAM BUILDING

Art with Heart is eager to work with partners to adapt our creative expression training to the unique needs of schools and organizations. If you don’t see a training that fits your needs on our website, call us to discuss developing a custom training of 1-hour team building experiences.

PHONE: 206-362-4042
EMAIL: trainings@artwithheart.org

Curricula (Leader’s Companions)

A Leader’s Companion (curricula) is available to accompany each book. When possible, we recommend books and curricula be used together. However, activities in the curricula can be used on their own. All curricula are $50 each and include:

- 100+ art activities
- Alignments with Common Core, CASEL and Second Step
- Best Practices for creative expression
- Planning guides for implementing a creative expression program
- Tips and tricks for various art materials
